Senior Web Application Developer

Full-stack developer, with an emphasis on developing advanced, interactive user interfaces for modern web apps.

- **Experienced engineer**, with ten years of experience in software and web development.
 - **Proven leader**, with experience in teaching and mentoring junior developers and helping them gain meaningful experience and develop their skills as software engineers.
 - **Always learning** the new techniques and remaining on the cutting edge of the software development field. Always willing to learn new technologies and new techniques. "Best practices" change all the time.
-

Key Skills

- **Core Programming Languages:** C#, SQL, Javascript, HTML, CSS, PHP, C++, Java, VB, VB.NET
 - **Databases:** MS SQL Server, MySQL
 - **Technologies:** .NET MVC, Web API, jQuery, AJAX, WCF, AngularJS, Gulp, .NET Web Forms, Express, Node, Sharepoint, SPFX, ReactJS, Laravel, CakePHP, CodeIgniter, LAMP, KnockoutJS
 - **Team Development Methods & Tools:** Agile, Scrum, Waterfall, Team Foundation Server, Git, Sourcetree, JIRA
 - **Microsoft Certified:** MS Certified Solutions Associate (G868-3056), MS Certified Professional (G862-8627)
-

Experience

- **Cloudscale Corporation** | 2016 - Current | Microsoft Certified Solutions Associate / Consultant
Cloudscale Corporation is a Microsoft Solutions Partner specializing in developing cloud-based solutions for Azure, Office 365 and Sharepoint.
 - Most billable senior developer on staff. Consistently managed multiple projects across multiple clients.
 - Gathered project information from clients to create business requirements and provide estimates and statements of work.
 - Led daily scrum stand up meetings. Created sprint plans for projects. Worked with project managers to keep track of bugs, log hours, and track time spent
 - Developed and maintained web applications using a variety of frameworks, including: ASP.NET Web API, .NET MVC, AngularJS, Angular 2/5/6, React, Sharepoint, SPFX Framework. All projects hosted on Azure.
 - Developed Continuous Integration for all projects using VSTS with Azure deployments.
 - Built modern front end UI using the latest frameworks like React and Angular.
 - Built REST services with Web API, Azure Databases, and Azure Active Directory authentication.
- **Photon Medical Communications** | 2015 - 2016 | Web Application Developer
 - Re-wrote entire front end web stack using ASP.NET MVC C# with jQuery and Bootstrap.
 - Built custom HTML5 canvas views to allow doctors to view and manipulate x-rays, CT scans, and echos on the web and on mobile devices.
 - Built REST services with Web API and SQL Server to support Web, Android and iOS apps.
 - Worked closely with UI designers to provide consultation and feedback on best practices in user experience and what can/cannot be done with web.
 - Created mobile web app version of our application that works near identical to our Android/iOS versions.
 - Built Photon Chat, a single page web application (SPA) with AngularJS and Web API.
- **Valley Integrated Development** | 2013 - Current | Owner and Web Application Developer
 - Developed enterprise and client-facing web applications and mobile applications
 - Worked in a variety of environments, including ASP.NET MVC, Web Forms, VB.NET, Classic ASP, PHP, Android, and iOS
 - Provided experienced consultation to clients and customers of clients to help them translate their needs into requirements and help them choose the correct technologies for their needs.

- Worked with a team of developers, network engineers and business professionals on a daily basis. Organized and ran meetings, planned development tasks, and managed client expectations.
- Created coding standards and basic design structures with documentation, allowing other developers to easily build and expand upon the original structure.
- **Integrate.com** | 2011 - 2013 | Web Application Developer
 - Built lean, ajax-driven, advanced user interfaces with unobtrusive javascript and .NET MVC for client-facing application.
 - Developed a custom, in-house developed unobtrusive javascript framework, built to work with the custom model-binders and razor helpers also developed for in-house use.
 - Developed a proprietary mobile advertising tracking system that identified and tracked users between applications using unique device identifiers and fingerprinting techniques.
 - Worked in a variety of environments, including ASP.NET MVC, Android, and iOS.
 - Trained new hires and mentored junior developers
 - Established relationships between management and development team for better communication of tasks and their development requirements.
- **The Bridge Media** | 2009 - 2011 | Web Designer/Developer
 - Designed custom wordpress sites for customers.
 - Developed a management portal to maintain, access, and control over 200 wordpress microsites from one interface.
 - Worked directly with customers, content writers, and graphic artists to help develop and maintain a variety of blogs, news sites, and customer-owned sites.
 - Worked in a variety of environments, including PHP and ASP.NET.
- **Blackstar Networks** | 2008-2009 | Web Application Developer
 - Designed, developed and maintained Teltonic.com, a third-party online cell phone retailer in ASP.NET.
 - Re-imagined Teltonic into a solution that could be white-labeled and re-themed to look like any existing web storefront.
 - Worked specifically in ASP.NET C# Web Forms
- **Sestus Data** | 2008 | Code Migration Engineer
 - Migrated Phishcops product, a banking multi-factor authentication security software module, from classic ASP (VBScript) to C# and VB.NET versions.
 - Maintained and upgraded code changes between VBScript and .NET versions as VBScripts developers made changes.
 - Built, commented and flower boxed. The code was sold as the product, so the delivered product would contain full documentation.
- **Sir Alistair Rai** | 2006 - 2008 | Web Designer/Developer
 - Designed, built and maintained web storefronts for SirAlistairRai.com and SDHQOffroad.com.
 - Added/removed products from site.
 - Managed online advertising campaigns.
 - Migrated store fronts from classic ASP into more modern ASP.NET DOTNETSTOREFRONT

Education

- **University of Advancing Technology** | 2005-2007 | No Degree
 - Software Engineering with a focus on Web Architecture
 - Left before finishing to continue pursuing full-time career.
- **Forman School** | 2001-2005 | High School with Honors
 - Honors Program
 - Team member of Costa Rican Rainforest Research Project for college credits.
